To reset router and connect to the internet using the router's default configuration:

1) Press and hold the default Reset button, located on the back of the device for at least 15 seconds. (This may require a paperclip/toothpick etc.)

2) Release the Reset button and wait for the router to reboot. You can tell it is rebooting because both the "US/DS" and "Online" lights will turn off. The router will take a few minutes and may not be back online until both the "US/DS" and "Online" lights are solidly lit.

3) Once the router has been reset, you will be able to utilize the default network credentials to access your Wi-Fi network. Refer to the label on the bottom of the router with the network SSID and Network Key (password, case sensitive):
